The NAPFSC/SAF section of the Academic Year 2000/2001 Current Faculty and 1999/2000 New Faculty Hired report presents data concerning the number, average monthly salary and full-time equivalents of new faculty hired by appointment, rank, academic area (Natural Resources and Forestry), academic specialization, high degree, gender, race/ethnicity and citizenship in the agriculture administrative units at NAPFSC and SAF member institutions.

The Natural Resource area contains 11 academic specializations and the Forestry area contains 15 academic specializations. These specializations are based on the U.S. Department of Education's "Classification of Instructional Programs (CIPs) Codes." The CIPs codes used for the Academic Year 2000/2001 Survey of Faculty were chosen through cooperation from both SAF and NAPFSC (National Association of Professional Forestry Schools and Colleges). Please see Appendix A for a list of academic specializations and their definitions for the Natural Resource and Forestry cohorts. Cohorts are also provided for Agriculture and Non-Agriculture or Non-Natural Resource or Forestry programs administered by the reporting schools, colleges or universities. Caution is advised in analyzing these data as they represent only that portion of agricultural programs administered by NAPFSC and SAF member units.

Figure 15 presents the average monthly salary of full-time Resident Instruction Faculty in Academic Year 2000/2001 by race/ethnicity and gender. The highest average monthly salary (\$6,937) occurred among the 4,351 Caucasian males. Native American females had the lowest average monthly salary (\$5,153) (Table 66 ). Figure 16 shows the percentage of the 86 New Faculty Hired by academic area in Renewable Natural Resources and Forestry Programs of NAPFSC/SAF member institutions. The largest academic area, Natural Resources accounted for 59.3 percent (51 of 86) of total resident instruction New Faculty Hired. (Table 68).
